

Logical framework: overall objective and specific objective - Examples

Example 1:

Project: Combating trafficking in women for the purpose of sexual exploitation in the municipality of San Borja, Bolivia (CECASEM).

	Objectively verifiable indicators	Sources of Verification	Assumptions
<p><u>Overall objective</u></p> <p>Sustainable fight against human trafficking and in particular trafficking in women for sexual exploitation in Bolivia.</p>	<p>At least 50% of young people and adolescents in the municipality of San Borja are aware of the risks and threats linked to human trafficking.</p>	<p>Survey of young people and adolescents in San Borja.</p>	<p>/</p>
<p><u>Specific objective</u></p> <p>Reduce the vulnerability of young people and adolescents (girls and boys) in the municipality of San Borja (Bolivia) to the crime of trafficking by developing awareness-raising tools and strengthening the economic capacities of women.</p>	<p>At least 80% of the 1,500 secondary school students from urban schools involved in the project have acquired solid knowledge on how to identify and protect themselves from human trafficking situations.</p>	<ul style="list-style-type: none"> - Lists of students participating in the project. - Surveys of young secondary school students participating in the project. 	<p>Civil society in the municipality of San Borja calls on local authorities to continue actions aimed at young people and adolescents aimed at combating trafficking in human beings.</p>
	<p>At least 30% of the 100 students from rural secondary schools involved in the project actively participated in the development of actions to prevent trafficking in human beings and the development of a collective business around the "healthy food" produced by their families. At least half of this 30% are women.</p>	<ul style="list-style-type: none"> - Lists of students participating in the project. - Project reports on activities carried out for the prevention of trafficking in human beings. - Register of young women and young men participating in the development of collective trade-in "healthy food". 	<p>The municipal authorities of San Borja encourage the development of collective trade in agricultural products among the young population.</p>

TOOLS – PHASE 1 : PROGRAMMING

	<p>The number of young people working on “profitable” agricultural farms increased by at least 100% in the first year of the project (rural area).</p>	<p>Survey of young people and adolescents in rural areas of San Borja.</p> <p>- Studies and monitoring of the implementation of collective trade around "healthy food". + Keeping of the register of participants.</p>	<p>Young children from rural producer families in the municipality of San Borja agree to adopt agroecological practices to consolidate the positioning of their products on the main urban markets.</p>

TOOLS – PHASE 1 : PROGRAMMING

Example 2 :

Project: Support for training and creation of a multi-purpose center in Thylla, Senegal (Jappo Liggeye).

	Intervention logic	Objectively verifiable indicators (OVI)	Sources of Verification	Assumptions
Overall objective	Improvement of the living conditions of the most vulnerable people in Thylla (target audience: women, out-of-school girls, adolescents, people with disabilities).			
Specific objective	Increase in the income of the target audience by learning the methods of production, processing, and marketing of promising local agricultural products.	<p>A total of 150 beneficiaries are trained over a period of 6 months during the implementation of the project (70 beneficiaries for processing activities, 20 for dyeing professions and 60 for sewing professions).</p> <p>Theoretical and practical training will be provided by area.</p> <p>Obtaining a minimum monthly income of 25,000 FCFA allowing the financial autonomy of the beneficiaries</p>	<ul style="list-style-type: none"> - quarterly narrative and financial reports - attendance book - certification of professional training of beneficiaries - testimonials 	<p>The authorities are withdrawing their authorization for the implementation of the project. Low risk. The Jappo association benefits from perfect collaboration with the authorities in its activities.</p> <p>The populations do not respect the training schedules. Low risk. Awareness actions will be undertaken.</p> <p>The demand for local agricultural products is low which leads to a lack of income for the beneficiaries. Low risk: Promising products with high demand.</p>
