

### **Origin of a project - Writing guide**

Here are the questions you must answer when describing the origin of your project:

- when was the project born? When?
- on which occasion was the project born? Under which circumstances? Is it following another project (example: realization of the same project in another region) or following a particular observation (example: lack of water in the high Andean regions of Bolivia).
- who is at the origin of the writing of this project (person, structure ...)?
