

Examples of monitoring indicators

This is quantitative data. Here is a list of examples:

- number of infrastructures built (well, house, etc.) during the X months of the project
- number of beneficiaries having followed training over X months
- number of people benefiting from an adapted nutrition or health program throughout the project
- number of children sponsored during the duration of the project
- number of kilos of products (coffee, cereals, etc.) processed or sold during the X months of the project
- number of micro-credits allocated at the end of the project...
